## DETAILED ACTION

### ***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

**Claim1-7** is rejected under 35 U.S.C. 101 as not falling within one of the four statutory categories of invention. While the claims recite a series of steps or acts to be performed, a statutory “process” under 35 U.S.C. 101 must (1) be tied to another statutory category (such as a particular apparatus), or (2) transform underlying subject matter (such as an article or material) to a different state or thing (Reference the May 15, 2008 memorandum issued by Deputy Commissioner for Patent Examining Policy, John J. Love, titled “Clarification of ‘Processes’ under 35 U.S.C. 101”). The instant claims neither transform underlying subject matter nor positively tie to another statutory category that accomplishes the claimed method steps, and therefore do not qualify as a statutory process.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

**Claim1, 5-9** is rejected under 35 U.S.C. 102(b) as being anticipated by Kiyama et al (JP 2002-373480).

Regarding claim1,8, 9, Kiyama et al (hereinafter Kiyama) anticipates a data recording method for recording, onto a recording medium, AV data and post recording data in synchronization with the AV data, on the recording medium(see abstract; paragraph 0022), a plurality of user programs using an identical scene in the AV data being producible (see paragraph 0069), and the post recording data being referable from a plurality of user programs (see paragraph 0047;0146- 0147) , and onto the recording medium, management information that manages a relationship between a user program and post recording data being recorded (see paragraph 0147).

Regarding claim5, the data recording method as defined in claim 1, wherein, the management information includes information of how many times the postrecording data is referred to from a plurality of user programs (see paragraph 0066-0067).

Regarding claim6, data recording method as defined in claim 1, wherein, the management information includes a name of a user program referring to the postrecording data (see paragraph 0053).

Regarding claim7, the data recording method as defined in claim1, wherein, the management information includes information of in what range of the postrecording data a user program refers to (see paragraph 0085-0090).
